The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-6, 9-11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Houston '758.

Houston shows a rotary valve with seals formed of a pair of grooves on each side of flow channel formed by plates 188, 190 which receive purge gas through 382, 384, 388, 390, see Figure 8, the fluid seal extending on the axial ends of the plug as well.

Applicant's arguments filed December 5, 2006 have been fully considered but they are not persuasive. As to the language added to the claims, the seals of Houston extend to the sides of the flow passages and can be reasonably described as being offset. As to the meaning of labyrinth seal, the specification gives some exemplary descriptions but does not explicitly limit the meaning. One example is that it is a non-contact seal without a separate seal which is subject to abrasion, see page 3, last paragraph. Accordingly, Houston can be reasonably read as having labyrinth seals.

Claims 7-8 and 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
